Tetouan, Morocco

I am a Data Science student with a strong background in software engineering and a solid foundation in Python and applied machine learning. I work with data frames, data analysis, data engineering pipelines, and data visualization to build predictive models. I use tools such as Pandas, Scikit-learn, and TensorFlow for data manipulation. I am seeking an internship opportunity to apply my skills to real-world datasets and support data-driven decision making.

Skills

Programming	Python
Machine Learning & AI	Scikit-learn, TensorFlow, Supervised & Unsupervised Learning
Data Analysis	Pandas, NumPy, Data Cleaning, Feature Engineering
Data Visualization	Matplotlib, Seaborn
AI Domains	Natural Language Processing (NLP), Computer Vision
Databases	SQL , MySQL, MongoDB, SQLite
Tools & Platforms	Jupyter Notebook, Google Colab, Git/GitHub ,LaTeX
Methodologies	Agile, Jira
Other Technical Skills	PHP, Java, JavaScript, HTML, CSS, Laravel, Tailwind

Experience

May 2024 – July 2024

E-Commerce Development Intern, Forbest, Rabat, Morocco

- Designed and developed a web-based e-commerce platform specializing in construction tools and equipment
- Designed and developed a web-based e-commerce platform specializing in construction tools and equipment
- Implemented a product management system with categorization, inventory tracking, and a user-friendly interface.

Apache | Php | Laravel | React | js | Bootstrap | Tailwind | CSS | Html | Npm | Git

May 2023 – June 2023

Employee Management System Developer (PFE Internship), AYTAMZ, Tetouan, Morocco

- Developed Employee Management System using Laravel MySQL
- Implemented employee record management, attendance tracking, and payroll features
- Designed user-friendly interface for HR personnel
- Ensured data security with role-based access control
- Collaborated to meet objectives and deliver project on time

Php | Laravel | js | Bootstrap | CSS | Html | livewire | Npm | Git

Education

2024 – Present	Master's Degree in Data Science
2024	Professional License in Software and Web Development
2022	OFPPT Technician Specialized in Web Development (Full-Stack)
2020	Scientific Baccalaureate, SVT option

Projects

Handwritten Algorithm Recognition and Python Translation

Developed an ML-based application to recognize handwritten algorithms and translate them into Python code.
Worked on preprocessing, feature extraction, and model training for handwritten logic understanding.

Tree Species Classification using Point Clouds and Multi-view Learning

Implemented and compared multiple methods for tree species classification using 3D point cloud data and multi-view image representations.
Explored classical ML, CNN-based approaches, transfer learning, and direct 3D deep learning models such as PointNet and DGCNN, with extensive evaluation using accuracy, F1-score, and balanced accuracy.

Gradient Descent Application

Implemented gradient descent from scratch and visualized convergence behavior.
Focused on optimization concepts used in machine learning training.

Image Classification

Built an image classification model with training and evaluation on labeled data.
Included dataset preprocessing and performance analysis.
